DETAILED ACTION

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

2. The abstract of the disclosure is objected to because it contains subject matter not related to the abstract (e.g. Fig. 3). Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claims 1-2 are objected to because of the following informalities: The word "and" throughout the claims appears to be redundant. It appears that only the last appearance of the word "and" should remain in the claims. Appropriate correction is required.

Conclusion

4. Claims 1-2 are objected, but would be allowable if corrections are made.

The prior art of record teaches that it is well known to have an apparatus having means for scanning and printing with output and feeding means, however, the prior art of record does not teach or suggest (in combination with other features in the claim) an apparatus having the withdrawal means and mechanism as described in lines 5-14 of claim 1.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Stodder et al. (5,651,623 and 5,727,890) teaches a multiple function printer with common feeder/output path mechanisms and method of operation.

Art Unit: 2624

Zepeda et al. (5,738,454) teaches a multiple function printer with common output path mechanism with floating guide ribs to accommodate media and documents of different thickness.

Kellogg et al. (5,833,381 and 5,896,206) teaches a removable document feeder cartridge for combination printer and scanner.

Jang (6,227,533) teaches a multi functional sheet feeding apparatus.

Hendrix et al. (6,457,707) teaches an automatic document feeder.
